

RUDRA NARAYAN ROUT

☎ +91 8249113542 | [Gmail](#) | [LinkedIn](#) | [GitHub](#)

Aspiring Full Stack Software Developer and CS undergraduate at KIIT University with hands-on experience in Java/Spring Boot backends and JavaScript/HTML frontends. Completed internships in AI & ML and industrial software development. Exploring Python-based AI/ML with TensorFlow and scikit-learn.

SKILLS

- **Language:** Java, Python, JavaScript, C
- **Frontend:** HTML, CSS, JavaScript
- **Frameworks:** Spring Boot, Node.js, FastAPI, Flask, REST API Design
- **Databases:** MySQL, PostgreSQL — schema design, joins, indexing, query optimization
- **AI/ML:** NumPy, Pandas, scikit-learn, TensorFlow
- **Principles:** DSA, OOP, SOLID principles, layered architecture (Controller → Service → Repository)
- **Tools:** Git, Maven, IntelliJ IDEA, JUnit

TRAINING

Web Development in Java

September 2023 – October 2023

Elenxia — Hands-on training covering Java-based web development, REST API development, Spring Boot, and database integration with MySQL.

AI & ML Internship (With Python) — IntersElite

Aug 2025 – Oct 2025

Verified internship in AI & ML using Python; demonstrated exceptional dedication and competence. Cert ID: IT/25/AIML-PY-A6/IC-11531.

Web Development in Java — Elenxia

Sep 2023 – Oct 2023

Hands-on training in Java web development, REST APIs, Spring Boot, and MySQL database integration.

PROJECTS

Online Banking Management System | Java · Spring Boot · MySQL · Spring Security · JUnit

- Built a full backend system for bank accounts, transactions, and customer records with Spring Boot and MySQL.
- Implemented Spring Security for JWT-based authentication and role-based access control (customer vs. admin).
- Designed normalized schema, built REST APIs with full validation, and wrote JUnit tests for core business logic.

EV Charging Station Booking System | Java · Spring Boot · MySQL · PostgreSQL · Hibernate

- Built a booking platform for EV station slot search, reservation, cancellation, and history retrieval via REST APIs.
- Handled concurrent booking conflicts with DB-level constraints and optimized queries using Spring Data JPA/Hibernate.
- Tested all endpoints with Postman and documented request/response contracts for front-end integration.

EV Station Finder | python · HTML · CSS · JavaScript

- Developed a frontend web app for locating nearby EV charging stations with search and filter functionality.
- Built responsive, mobile-friendly UI using vanilla JS; repository has received community stars and forks on GitHub.

Smart Emergency Response System — Odisha | HTML · CSS · JavaScript

- Built a web platform connecting citizens with emergency services, featuring geolocation-aware incident reporting.
- Designed an intuitive dashboard for both citizens and responders with real-time status indicators.

EDUCATION

B.Tech — Computer Science and Engineering | KIIT University, Bhubaneswar 2023 – 2027

Relevant coursework: Object-Oriented Programming in Java, DBMS, Data Structures, Computer Networks
